Letter from the Superintendent,

Welcome to Jackson County Schools website. Our system consists of 17 schools throughout the county. We strive to build a strong foundation based on great teachers, staff, and a supportive community. My goal is to ensure that each school in our district aims for excellence.

Jackson County's pursuit of a top-notch education is one that we can all share. Our system's goal is to prepare all students to become college and career-ready using innovative resources and a rich learning environment. Student success is a priority in our system. Our schools continue to have prominent success stories of Jackson County alumni.

The need to stay focused on improving the academic performance of our students and the commitment to a safe learning environment remain top priorities. We believe all students can realize their full potential when challenged to be their best.

Thank you for supporting our students and our district.

Sincerely,

A. Jason Davidson  
Superintendent
